

Full Time: Audiovisual Installation Technician

MultiTek Solutions is focused on providing high quality installation services and excellent customer service to all its clients, and is currently seeking a full time 'Audiovisual Installation Technician' to join its team.

An immediate start has become available for an experienced 'Audiovisual Installation Technician'. You will be required to carry out installations of data projection systems, professional sound systems, lighting control systems, audiovisual control systems, and various other industry-specific equipment.

You will pay attention to detail and have an excellent work ethic; you will also display a high level of workmanship and initiative and have excellent communication skills.

Other qualities sort, but not limited to include; excellent fault finding and computer skills, knowledge of electronic systems, cabling and termination experience, sound knowledge and experience in installation practices and some construction industry experience.

- Formal qualifications preferred but not essential.
- Entertainment Industry, Theatrical performance &/or Construction site experience highly desired
- A current manual driver's license, construction industry induction card & Working With Children's Check is required
- Salary commensurate with level of experience, including super, overtime, construction penalty rates, & phone. Negotiable depending on qualifications and experience.

* This position does not involve hire or any live production work
